VALENTINO ARAYA

Full Stack Developer

TypeScript | React | Node.js
San Rafael, Argentina | valentinoaraya04@gmail.com | linkedin.com/in/valentinoaraya | github.com/valentinoaraya | valentinoaraya.com

PROFESSIONAL SUMMARY

Full Stack Developer specialized in TypeScript, React and Node.js, with 3+ years of hands-on experience building web applications, SaaS platforms and custom systems for real clients in production. End-to-end development of solutions, including frontend, REST APIs, databases, deployment and infrastructure management on Linux servers. Experience administering production VPS, configuring Docker, Docker Compose, Nginx, PM2 and Traefik, managing domains and SSL, monitoring, deployments, and handling security incidents and recovery of compromised servers.

TECHNICAL SKILLS

Frontend: React | TypeScript | JavaScript | Next.js | Vite | HTML | CSS
Backend: Node.js | Express | Fastify | TypeScript | REST APIs
Databases & Services: PostgreSQL | MySQL | MongoDB | Prisma ORM | Drizzle ORM | Supabase | Firebase
AI & LLM: RAG | Embeddings | pgvector | Vercel AI SDK | Ollama
Testing: Jest | Vitest
Infrastructure & DevOps: Linux | Docker | Docker Compose | Nginx | PM2 | Traefik | VPS Administration | Git | GitHub | GitHub Actions | Domain & SSL Management | Deployments | Monitoring

EXPERIENCE & PROJECTS

Liga Gestión - Municipal Basketball League

Full Stack Developer

Custom system for the end-to-end management of a basketball league, including player registries, tournaments, scoresheets and public statistics.

Stack: React | TypeScript | Express | Prisma | Supabase | Cloudinary

- Designed and implemented a full stack monorepo with an Express API and shared Zod contracts.
- Built the competition module to manage tournaments, registrations, fixtures, groups and playoff brackets.
- Implemented an offline-first scoresheet PWA using IndexedDB, exclusive scorer-table claiming and idempotent synchronization.
- Developed backend sports rules for fouls, timeouts, quarters, overtime, forfeits/no-shows and tiebreakers.
- Built a public portal with standings, box scores, statistics and player profiles.
- Implemented an admin back office for player registries, transfers, bulk import, digital signatures and auditing.

Tu Repe - Sports Streaming SaaS

Full Stack Developer

SaaS platform for watching matches automatically recorded at sports clubs online. github.com/Aedes/tu-repe

Stack: React | Express | TypeScript | MySQL

- Developed the full frontend and backend.
- Implemented the recording and storage system for streams from sports cameras.
- Integrated the Backblaze B2 API for cloud video storage.
- Built a REST API to manage and serve recorded matches.
- Implemented automated testing with Jest. Handled full deployment on a self-managed VPS. The system is currently used by sports clubs.

Cursada - AI Study Copilot

Personal Project · In progress

RAG-based study copilot. github.com/valentinoaraya/cursada

Stack: TypeScript | Fastify | Next.js 16 | React 19 | PostgreSQL 17 + pgvector | Drizzle | Zod | Vercel AI SDK | Ollama

- Building a RAG study copilot that answers from the user's own notes and cites the source file and page; responses streamed via SSE, with per-user and per-subject isolation.
- Designed a TypeScript monorepo with hexagonal architecture, using ports and adapters to keep the domain independent of the database and LLM.
- Implemented PDF ingestion (unpdf) with SHA-256 deduplication and per-page metadata, plus hybrid search combining Spanish full-text search and vector similarity (nomic-embed-text embeddings via Ollama).
- Added guardrails: abstains without calling the LLM when no evidence is found, and validates citations against retrieved passages.
- Applied spec-driven development, TDD and BDD (Vitest, Cucumber.js, Testcontainers), ADRs and CI with GitHub Actions. Roadmap: evaluation suite and deployment.

EDUCATION

Information Systems Engineering — Universidad Tecnológica Nacional (UTN)
2023–Present | 4th year | GPA: 8.54/10

Full Stack Development Program — Coderhouse
2022–2023

High School Diploma in Computer Science — Instituto San Antonio
2018–2023

LANGUAGES

Spanish: Native | **English:** B1 (Intermediate)
